Cash Prizes

There are cash prizes for the authors of the best refereed paper and also the best paper written by a student in each stream as determined by the Program Committees. There will also be a cash prize for the best poster at the conference, as voted for by delegates.

AI Open Microphone Session

This is an opportunity for delegates to give a brief and informal presentation on any subject of their choice, such as a proposed research project, a request for assistance, a response to issues raised in the conference, a demonstration or even a short comedy or spoof talk on an AI theme. **Come along and have your say!**

FAIRS 2019 – December 16th 2019

The conference will be preceded by a separate free one-day training event for AI research students. Details are on the conference website.

Discounts

There are discounts on the registration fees for members of SGAI and any other AI society which is a member of EurAI. There is also a special reduced rate for students and group discounts are available.

AI-2019 Thirty-ninth SGAI International Conference on Artificial Intelligence
http://www.bcs-sgai.org/ai2019/

**CAMBRIDGE, ENGLAND
17-19 DECEMBER 2019**

AI-2019 is the thirty-ninth Annual International Conference of the British Computer Society Specialist Group on Artificial Intelligence (SGAI). It will be held in the attractive surroundings of Peterhouse College, Cambridge.

This is the leading series of UK-based international conferences on Artificial Intelligence and the longest running AI conference series in Europe

Guided tour of Cambridge:
Optional two-hour guided walking tour of Cambridge (including entry to King's College) free of charge on the second day

December 17th

The first day of the conference will be devoted to a range of tutorials and workshops providing practical knowledge of recent developments in AI. On this day SGAI is hosting this year's UK CBR workshop. There are expected to be at least two other half-day workshops to provide greater depth in selected topics.

December 18th - 19th

The conference will run two parallel streams. The Technical Stream will present refereed papers on important recent technical developments.
The Applications Stream will present refereed papers describing practical applications of AI. Both streams will include an invited keynote lecture by a leading expert. There will also be a panel discussion on a topical subject, an Open Microphone session and a Gala Dinner on the final evening.

Conference Proceedings

Accepted papers will be published by Springer in Lecture Notes in Artificial Intelligence (a sub-series of Lecture Notes in Computer Science) with the title *Artificial Intelligence XXXVI*. Expanded versions of the best papers from each stream will be reprinted as a special issue of an international journal.

Poster Sessions

The Poster Sessions are intended for the presentation of work which meets the high standards of the conference, but which is more topical and preliminary than the work presented in the main two streams. Papers submitted to either stream not deemed suitable for oral presentation in full form will be considered as posters. Poster papers will be included as short papers (6 pages) in the proceedings.
